

Hey Harish,

Your assignment is to write automated test cases on insider.in website using Cypress
- <https://www.cypress.io/>

Here's what to automate:

1. Go to <https://insider.in/>
2. Choose any city on random from the menu to the right.
3. Open the page of the first event under the "FEATURED EVENTS" section. For e.g. Bacardi NH7 Weekender 2019, Pune.
4. Once you are on the event page (EDP as we call it), click on the "BUY NOW" button.
5. You will be asked to choose between options such as "Tickets", "F & B Coupons". Click on the "Buy" button for "Tickets".
6. Now choose 1 quantity of the first option. Currently it shows "Phase 2 | Under 21 Season Ticket". Click "Buy".
7. If you are redirected to <https://insider.in/buy/checkout> page, ticket purchase is successful and your tests should conclude at this point.
